Hi Brian,

The Marcellus Shale Coalition is interested in this information. In particular, the UIC committee within the coalition has a more specific interest and they are comprised of around 20 people.

Renee – who is “industry” specifically. I want to broach this with Cliff when I share the draft agenda with him and would like to tell him what company wants to see their area of interest map.

Hi Brian,

We received a call from industry and they are interested in learning more about the EPA tribal consultative process and seeing the area of significance/concern that Seneca Nation shared with us.

Could you please make a note that we would like a minute or two for Dave to inform the Nation at the end of the meeting on Thursday about their comfort level on sharing their map with industry?

Thanks much!

Yep, I'd be happy to mediate the meeting. I'll send a draft agenda to you by COB today and then tomorrow send a communication message to the group at large with the agenda.

Hi Brian,

I wasn't sure if we should have a pre-meeting or not for our consultation kickoff for Sandstone Development permit for the Seneca Nation. As you saw with my communication with Cliff, they'd like EPA to explain what enhanced recovery is and how it differs from disposal. I'm putting together a couple of slides right now for that. I'm not really sure what comments the Nation will have on this permit. Did you want to run the meeting again and create an agenda like you did last time for Catalyst? If you think we need to set up a short meeting to go over anything, I can certainly do that.
